

ONE WAY & NON SLAM CHECK VALVE

FOR WASTWATER COMBINATION AIR VALVES: D-020 / D-025

The same check valve suitable for the three functions.
Instructions:

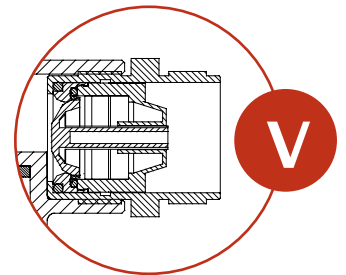

NS "ONE WAY - NON SLAM "

Protects from water hammer effects in the pipeline system, in situations such as water column separation, deep well pumping and rapid filling of mains

V "ONE WAY OUT"

It is specially designed to prevent air from entering the pipeline. Installed at the pump station. This feature is beneficial for maintaining vacuum to aid in keeping the pump primed

I "ONE WAY IN"

Specially designed to prevent air from being released from the pipeline. For use in residential areas to enable vacuum breaking while preventing the release of odorous gases from the sewage pipeline.
