

# ONE WAY & NON SLAM CHECK VALVE

FOR COMBINATION AIR VALVES: D-040 / D-040-C / D-020 / D-025

The same check valve suitable for the three functions.  
Instructions:

## **NS “ONE WAY – NON SLAM ”**

Protects from water hammer effects in the pipeline system, in situations such as water column separation, deep well pumping and rapid filling of mains

## **V “ONE WAY OUT”**

It is specially designed to prevent air from entering the pipeline. Installed at the pump station. This feature is beneficial for maintaining vacuum to aid in keeping the pump primed

## **I “ONE WAY IN”**

Specially designed to prevent air from being released from the pipeline. Used mainly in D-020, D-025 sewage air valves applications

For use in residential areas to enable vacuum breaking while preventing the release of odorous gases from the sewage pipeline.
